

Exact McNemar test: a Binomial with $p = 1/2$

k , among $n_{01} + n_{10} = 40$ discordant texts

■ $P(n_{01} = k)$ under H_0 : Bin(40, 0.5)

■ as or more extreme than observed

— $d = 0.03$, $n_{80} = 2608$

— $d = 0.05$, $n_{80} = 934$

— $d = 0.12$, $n_{80} = 156$

--- 80% power

Power of the paired test, $q = 0.3$
