

Simulated TAR: $\phi_{\text{in}} = 0.9$, $\phi_{\text{out}} = 0.4$

Decay in one regime

- band $|d_t - 1| \leq c$, $c = 10$ bp
- deviation d_t (bp)
- $\phi = 0.3$: half-life 0.58 days
- $\phi = 0.6$: half-life 1.36 days
- $\phi = 0.9$: half-life 6.58 days
- half of the deviation left
