

Discovery sample: how many tests survive?

Holdout check

..... $l_{tl} = 1.96$: 21 of 102 pass

--- BH, FDR 10%: 13 pass

-.-. $l_{tl} > 3$: 4 pass

— joint null, 95% of $\max l_{tl} = 3.32$: 1 passes

--- Holm first step, FWER 5%: $l_{tl} > 3.49$, none

● $l_{tl} < 1.96$ in discovery

● discovery $l_{tl} > 1.96$, fails in holdout

◆ replicates: same sign, $l_{tl} > 1.96$
