

QQ plot vs the Normal distribution

Gaussian GARCH(1,1): kurtosis vs α

• Standardised residuals $\hat{z}_t$
 — $\alpha + \beta = 0.99$

— $\alpha + \beta = 0.983$ (fit)
 • $K = 13.9$ at $\alpha = 0.088$

■ Fitted: $\hat{\alpha} = 0.106$, $K = 8.9$
