

S&P 500, Jan 1990 - Aug 2020; evaluation from 2012-09-19

Alignment of one training pair

target: the daily return r_{t+10} , predicted from x_t

$r_{t+1} + \dots + r_{t+10}$: cumulative 10-day return, a different target

— Tuning sample (5,726 days)

— Cross-validation: 20 random test days, each with ± 5 neighbouring days excluded

— Evaluation sample (last 2,000 days)
