

Slope of $\Delta \log E_{agg,k}$ on $\Delta \log A_k$ across 2,000 simulated stocks

-- eq. (28) pass-through, $\chi = 2.97$: 0.327

-- eq. (28) pass-through, $\chi = 0$: 1.000

■ $\chi = 2.97$: mean slope over seeds 1-10 (min-max bar)

■ $\chi = 0$: mean slope over seeds 1-10 (min-max bar)
