

MV-LO minus  $1/N$ , block 1:  $p = 0.63$

■ Bootstrap studentized statistic  
— Observed +0.50  
--- Critical values  $\pm 1.97$

Extrapolation with the difference held at its estimate

— HAC standard error if it falls like  $1/\sqrt{\text{years}}$   
--- Standard error needed for  $|z| = 1.96$ : 0.032
