

VR(q): dotted line = limit $(1 + \rho)/(1 - \rho)$

Implied $H(q) = 0.5 + \ln VR(q) / (2 \ln q)$ tends to 0.5

— AR(1), $\rho_1 = 0.109$ (BET)

— AR(1), $\rho_1 = -0.1$

◆ BET, implied $H(20) = 0.553$

◆ S&P 500, implied $H(20) = 0.453$
